

FALL ASPHALT MAINTENANCE CHECKLIST

SUNLAND
ASPHALT

CRACKED PAVEMENT

Fall is the perfect time to take care of any pesky cracks in your pavement that have developed over time. Sealing cracks is an important step in preventing additional asphalt wear.

POTHOLES

Potholes are a dangerous liability on any stretch of pavement. Patching potholes is a vital repair that prevents damage or injury from occurring on your property and should be fixed immediately.

SEALCOAT

Don't forget the ultimate step in protecting the longevity of your asphalt! Sealing the pavement with sealcoat, while the weather is still warm, will help protect against sun, oxidation and water.

COSMETIC WEAR

Cosmetic issues like oil stains or striping wear can make asphalt look much older and worn than it is. Keep up appearances by taking the time to freshen up your asphalt this fall!
